Address: House No. 1026, Azad Road,  
Manmad (Nashik) 423104

Current Location: Navi Mumbai, Maharashtra

#### Summary:

Highly motivated Junior Software Engineer and Web Developer with hands-on experience of 7 months in developing websites. Proficient in Java, Node.js, React, Angular, MongoDB, SQL Server, and skilled in translating requirements into application design and system requirements.

#### Technical Skills:

- Programming languages: Java, Node.js, JavaScript
- Databases: SQL Server, MongoDB
- Frameworks: Angular, React, Redux, Express.js, Material UI, Bootstrap, Tailwind CSS
- Other tools: Git, GitHub, Figma, PUG, Postman, Swagger

#### Work Experience:

Junior Software Engineer

Zensar Technologies, Pune

March 2022 – September 2022

#### Responsibilities:

- Implemented the frontend using React.js, creating reusable components for various parts of the website.
- Utilized Redux to manage the global state of the application, ensuring efficient state updates and a consistent user experience.
- Developed the backend using Node.js and Express.js to handle API requests and database interactions.
- Ensured responsive and visually appealing UI/UX across different devices and screen sizes.

#### Key Learnings:

- Gained a deeper understanding of the MERN stack and how Redux simplifies state management in complex applications.
- Learned to work collaboratively in a team environment, incorporating feedback and adapting to changing project requirements.

#### Education:

Bachelor of Engineering in Electronics and Telecommunication Engineering

Savitribai Phule Pune University

2021

Certification:

Java Full-Stack Developer

Codekul Pvt. Ltd., Pune

2023
